Snow and Avalanches

Description

Learn to know snow through a whole day formation.

From snow crystal formation to stratification of the snow coat, from meteorological aspects to avalanche formation and eventually artva use and caught up rescue.

The one day long course, held in a classroom in the morning, in a locality chosen by the organization will be divided in two parts: theoretical and practical.

During the theoretic lesson we will handle Snow Science (from snowflake to avalanche), functionment and use of artva and avalanche rescue organization. In the afternoon, after lunch break, we will go outdoors and put in practice what we learnt in the morning. In different artva fields, specifically prepared by Alpine Guides, you will gain familiarity with artva research, both for single or multiple burial

***Minimum number**

Course starts with minimum 4 participants.

Snow and Avalanches

Moving safely on snow means knowing it thoroughly.

From snow science to caught-up rescue, anything you need to know about Snow and Avalanches
